

# 3M<sup>™</sup> Scott<sup>™</sup> Ska-Pak<sup>™</sup> Plus Supplied Air Respirator

### **Supplied Air Respirator**

The Ska-Pak Plus supplied air respirator (SAR) is a combination escape SCBA and SAR that offers emergency respiratory protection in hazardous atmospheres, including those identified as immediately dangerous to life or health (IDLH).

This respirator features either a padded nylon or padded Kevlar® harness for additional comfort in extended wear applications and the E-Z Klip cylinder retention mechanism for quick and easy cylinder change-out.

The Ska-Pak Plus respirator is versatile and can be used in numerous markets, including chemical, food processing, petrochemical, oil and gas, ship building and public utilities for applications like confined space entry, hazardous materials handling, general maintenance and turnarounds.

## **Product Highlights**

- Includes E-Z Flo pressure demand regulator with first-breath activation and low exhalation resistance for easy breathing and reduced user fatigue
- 5-, 10-, or 15-minute rated cylinder egress options for selection versatility based on the job at hand
- Optional "E-Z Fill" auxiliary fitting facilitates direct connection to high-pressure cylinder charging systems to enhance efficiency
- E-Z Klip cylinder retention system for quick and easy cylinder change-outs
- Three harness styles:
  - Padded Polypropylene chemically resistant and lightweight
  - Padded Kevlar® ideal in high heat environments or when there is potential for sparking
  - Integrated Full Body Harness ideal for confined space applications

						СС	3000 Carbon, 10 min												
						FF	4500 Carbon, 15 min												

#### Part Number

Select a one- or two-digit number per box from the chart above that corresponds to your choice.

		 the same	-		- 4	 _	 	-	100
SAR	3			0				1	

- Must select Entry/Egress to select an air line option.
- 2. If you prefer an alternate facepiece style, head harness or size, choose "none" and order an approved facepiece as a separate line item.
- 3. Ska-Pak Plus with Full Body Harness does not fit into hard case.

#### **Combination Air Line**

As a Type C positive pressure respirator, the Ska-Pak Plus supplied air respirator can be used with various lengths of 3M Scott supplied air hose for a combination of up to 12 segments, totaling 300 feet\*. Available with Hansen, Schrader, Cejn, Hansen HK plug or Hansen HK socket fittings.

#### Regulator

The benefits of the E-Z Flo pressure demand regulator start with first-breath activation and its low exhalation resistance means less effort to breathe and less fatigue. Doffing is made simple with the E-Z Flo air-saver switch. Depressing the air-saver switch immediately stops the air flow into the mask. The Modulair offers quick disconnect to easily remove the regulator from the rest of the respirator.

#### Harness

The nylon and Kevlar® harness are lightweight with padded adjustable shoulder straps for maximum comfort. The harness includes web adjusters and quick release buckles. A strain relief location on the waist belt prevents the regulator's air hose from tugging on the regulator during operation. An integrated full body harness is also available which is ideal for confined space applications.

\*Exception: Hansen HK, maximum number of segments is 6, maximum length is 150'.

#### **Cylinder Options**

The Ska-Pak Plus supplied air respirator is available with the following rated cylinders, featuring the E-Z Klip cylinder retention system:

- 5-minute 2216 psi aluminum
- 5-minute 3000 psi carbon
- 10-minute 3000 psi carbon
- 15-minute 4500 psi carbon

#### E-Z Fill Cylinder Valve

Optional "E-Z Fill" auxiliary fitting facilitates direct connection to high-pressure cylinder charging systems to enhance efficiency (3000 and 4500 psi only)

#### **Facepieces**

The Ska-Pak Plus supplied air respirator is used with the AV-series facepieces, which feature the 3M Scott Top-Down Convertibility platform, allowing one facepiece to be used in numerous respiratory protection applications, from supplied air to air purified. This one-facepiece concept reduces inventory and training costs and eliminates the need to fit-test multiple facepieces for each employee.
