

SAFETY DEVICE LOCKOUT/TAGOUT HASPS

ABUS lockout hasps are ideal for group lockout applications. With these devices, main **power switches** and thus the energy sources can easily be locked out during maintenance or service work. This is an **easy and effective** way to avoid accidental restarting of the machine.

Key Features

- High-quality materials for different areas of application: recycled steel, spark-resistant aluminum or non-conductive plastic
- Holds up to 10 padlocks, depending on the model
- ST0801, ST0802: include pry-resistant interlocking tabs for added security
- Labeled hasp (18024) integrates buckle and tag in to one unit and is available in English and Spanish
