NX-1000 Nextteq® Sampling Pump and Tube System

Lifetime Warranty: Covers normal wear and tear for the life of your NX-1000 Sampling Pump.

Rubber Tube Inlet is a rubber flange into which the Nextteq detector tube is inserted.

Inlet Clamping Nut holds the rubber inlet in place.

Head Case is removable for aid in maintenance.

Pump Cylinder is made of metal to ensure smooth flow.

Unique Pump Design has a middle portion narrower than the ends to ensure a firm safe grip every time!

Unique Antibacterial Pump Body is covered with an antibacterial soft elastomer.

Pump Piston sealing assures excellent airtightness and durability.

Bottom Case is removable for aid in maintenance.

Tube Tip Breaker makes the tip breaking much easier, safer and convenient. Remove cap for easy disposal.

Bright Red Guide Marks on the shaft are aligned with the red guideline on the pump to place the handle at the initial position.

Unique Bottom Red Line is used to identify that the pump handle is fully inserted when the red line is no longer visible.

Unique Curved Handle two-finger design facilitates easy, consistent sampling. Clicking noise ensures complete sample pull.

Flow Finish Indicator protects against dust/dirt buildup and confirms the completion of the sampling of 100 mL or 50 mL.

Exclusive Thermal Ring accurately displays ambient temperature.
