Established in 1991, FallTech® began manufacturing only essential personal fall arrest components for select channel partners. During the next decade while demand grew and regulations were added, FallTech® increasingly expanded into many additional fall arrest solutions. Throughout this time, controlling and maintaining our in-house design, testing, manufacturing and sourcing processes became the foundational structure we continue to uphold today from our operations in Compton CA.

Fall Protection safety is more than a job for us – it’s our purpose and our enterprise. Our ISO 17025 accredited test lab ensures FallTech® products meet or exceed ANSI Standards and OSHA Regulations and always deliver uncompromised performance and resolute quality for our users even in their most demanding conditions.

28 years on from the basic provision of body belts and lanyards, the standards have changed and some regulations shifted but our commitment to your safety has not hesitated.
Selecting an appropriate anchorage connector for your fall arrest system is a critical element in protecting yourself and others from the flood of fall hazards that proliferate work sites everywhere. FallTech® anchorage connectors are designed to meet a wide variety of requirements for general and specific user applications. Solutions for temporary and permanent installation to steel structures, I-beams, concrete, roofing and specialty constructs not only provide worker confidence and reliability, they deliver that critical connection point for your fall arrest system.

**Steel Anchorages // Bolt-on, Weld-on and Sling**

**I-Beam // Fixed, Trailing and Overhead**

**Concrete // Single-use and Reusable**

**Roofing // Temporary and Reusable**

**Multi-Purpose and Specialty**
Bolt-on D-ring rotates 360° and pivots 180°, features 10,000 lbs static strength and includes Grade 8 bolt and nut for permanent installation.

Weld-on Puck for use with 7393 Rotating D-ring allows user to easily move single D-ring to multiple welded puck locations.

Weld-on D-ring rotates 360° and pivots 180°, features 10,000 lbs static strength and includes bolt-on puck for permanent installation.

Bolt-on D-ring features 2” x 4½” stainless steel anchoring plate and plated steel D-ring with ½” bolt holes requiring user-supplied fasteners for permanent installation.

Bolt-on D-ring rotates 360° and pivots 180°, features 10,000 lbs static strength and includes bolt-on puck for temporary or permanent installation.

Toggle-through moveable eyebolt anchor installs to 1¼” max steel substrate thickness and fits hole sizes from 13/16” min to 1½” max for temporary and reusable installation in steel structures.

Toggle-through eyebolt anchor installs to 1¼” max steel substrate thickness and fits hole sizes from 13/16” min to 1½” max for temporary and reusable installation in steel structures.

Toggle-through eyebolt anchor installs to 1¼” max steel substrate thickness and fits hole sizes from 13/16” min to 1½” max for temporary and reusable installation in steel structures.

Toggle-through eyebolt anchor installs to 1¼” max steel substrate thickness and fits hole sizes from 13/16” min to 1½” max for temporary and reusable installation in steel structures.

Toggle-through eyebolt anchor installs to 1¼” max steel substrate thickness and fits hole sizes from 13/16” min to 1½” max for temporary and reusable installation in steel structures.

Toggle-through eyebolt anchor installs to 1¼” max steel substrate thickness and fits hole sizes from 13/16” min to 1½” max for temporary and reusable installation in steel structures.

Additional lengths available

Bolt-on D-ring features 2” x 4½” plated alloy steel anchoring plate and D-ring with ½” bolt holes requiring user-supplied fasteners for permanent installation.

Bolt-on D-ring features 2” x 4½” plated alloy steel anchoring plate and D-ring with ½” bolt holes requiring user-supplied fasteners for permanent installation.

Bolt-on D-ring features 2” x 4½” plated alloy steel anchoring plate and D-ring with ½” bolt holes requiring user-supplied fasteners for permanent installation.

Bolt-on D-ring features 2” x 4½” plated alloy steel anchoring plate and D-ring with ½” bolt holes requiring user-supplied fasteners for permanent installation.

6’ pass-through choker anchor features ¼” galvanized steel cable available uncoated and with vinyl coating. Large and medium size O-rings allow simple pass-through choke-on installation leaving smaller O-ring as connection point for lanyard or SRL in temporary installation.

Hand-operated anchor with simple squeeze-open attachment features ¼” diameter stainless steel for temporary use on round overhead steel structures.
I-BEAM ANCHORAGES

Built for overhead I-beam anchorage, the FallTech® Beam Trolley is constructed with aluminum alloy and stainless steel components making it both lightweight and durable and, it boasts a wider range of fit versus comparable solutions. Easy to adjust and requiring no tools for installation, the trolley provides improved productivity and user efficiency. The beam trolley will effortlessly travel with the user and is ideally suited for use with SRLs in general industry applications.

Features:

1. 360° rotating forged aluminum D-ring.
2. Stainless steel wheel guards and wheel bearings.
3. High temperature resistance Nylacast wheels.
4. Secondary locking detent pin.

7712 | Beam Trolley Anchor

Trolley beam anchor features dual-clamp adjustment with aluminum crossbar and jaws, swiveling D-ring and bronze slider pads. Fits 3” to 14½” wide beam flanges up to 1⅞” thick for temporary and mobile use on horizontal I-beams.

7538 | Trailing Beam Clamp

Temporary

Trailing beam anchor features dual-clamp adjustment with aluminum crossbar and jaws, swiveling D-ring and nylon slider pads and concealed adjustment latches. Plated steel D-ring remains centered on crossbar and fits 3” to 14” wide beam flanges up to 1⅛” thick for temporary and mobile use on horizontal I-beams.

7530 | Trailing Beam Clamp

Temporary

Trailing beam anchor features single-clamp adjustment with aluminum crossbar and steel jaws with nylon slider pads and concealed adjustment latch. Plated steel D-ring slides with adjustment and fits 3” to 14½” wide beam flanges up to 1⅛” thick for temporary and mobile use horizontal I-beams.

7531 | Trailing Beam Clamp

Temporary

Trailing beam anchor features dual-clamp adjustment with aluminum crossbar and steel jaws with nylon slider pads and concealed adjustment latches. Plated steel D-ring slides with adjustment and fits 3” to 14½” wide beam flanges up to 1⅞” thick for temporary and mobile use horizontal I-beams.

Vertical beam anchor features single-jaw adjustment with aluminum crossbar and jaws. Threaded crossbar and knurled rings provide fine adjustment for fitting 3½” to 12½” wide beam flanges up to 2¼” thick for permanent installation on vertical and horizontal I-beams.

7535 | Vertical Beam Clamp

Permanent

Vertical beam anchor features single-jaw adjustment with aluminum crossbar and jaws. Threaded crossbar and knurled rings provide fine adjustment for fitting 3¾” to 12¾” wide beam flanges up to 2¼” thick for permanent installation on vertical and horizontal I-beams.

7533 | Trailing Beam Clamp

Temporary

Vertical beam anchor features single-jaw adjustment with aluminum crossbar and jaws. Threaded crossbar and knurled rings provide fine adjustment for fitting 3½” to 12½” wide beam flanges up to 2¼” thick for temporary mobile use horizontal I-beams.

7711 | Heavy Duty Beam Trolley

Temporal/Permanent

Beam trolley anchor features single-trolley adjustment with aluminum crossbar and wheel plates. Includes aluminum swiveling D-ring and high density Nylacast wheels and fits 4” to 18” wide beam flanges up to 1¾” thick for permanent or temporary use on overhead horizontal I-beams.

7534: Trailing Beam Clamp fits 3” to 18¼” wide flanges.

Meets ANSI Z359.18-2017
## Swivel-eye Expansion Wedge Anchors

0.7" x 4½" torque-indicating expansion bolt for concrete installation with Rotating D-ring Anchor available in single and multi-pack quantities.

## Additional Information

- Swivel-eye expansion wedge anchor features 5,000 lbs. static strength, requires 3½" min hole depth and allows 3/4" max hole diameter for temporary use in cured concrete.
- Swaged thimble expansion wedge anchor features 10,000 lbs. static strength, requires 4½" min hole depth and allows 1" max hole diameter for temporary use in cured concrete.
- 48" pour-in-place embed with connection loop and jacketed web, for loop-over or choke-on installation to embedded rebar during concrete pour. Remove and dispose after temporary use in cured concrete.
- Additional lengths available up to 12'
Single-use roof anchor features 6” x 1½” bend-in-place nailing plates and 3/4” connecting eye for temporary use on wood structures. Includes 16D nails for roof ridge installation.

Reusable roof anchor features hinged design, 10” x 3” anchoring plates and 2¼” connecting D-ring for temporary reusable installation on wood structures. Includes 16D nails for roof ridge or field installation.

Reusable anchor features hinged design, 10” x 3” anchoring plates and 2¼” connecting D-ring for temporary reusable installation on metal deck. Includes 1/4” self-tapping sheet metal screws.

Reusable D-ring plate anchor features 9” x 3” anchoring plate and 2¼” connecting D-ring for temporary reusable installation on wood roof structures. Includes 3” Grade 5 lag screws for roof ridge or field installation.

Dual Truss anchor is ideally suited for use with HLLs anchored along roof ridge. Features dual-installation methods including over-sheathing screw-down and interior under-truss for temporary and reusable applications on wood roof structures. Includes 1½” lag screws for over-sheathing install plus 4” and 6” U-bolts for interior under-truss fastening.

Single-D under-tile anchor features 17” stainless steel nailing plate with 2” connecting D-ring. Includes 16D stainless steel nails for permanent roof ridge or field installation on wood roof structures.

Twin-D under ridge cap anchor features 12” stainless steel nailing plate with 2¼” connecting D-rings. Includes 16D stainless steel nails for permanent roof ridge installation on wood roof structures.

Permanent Truss Anchor Set features 10¼” stainless steel post with 11/16” connecting eye. Includes weather resistant cap and flange plus 4D stainless steel nails for permanent roof truss installation on wood roof structures.

Pitched roof rotating SRL anchor features adjustable cradle for DuraTech® and most SRL brands up to 60’. Includes 2½” lag and sheet metal screws for wood and metal roof structures and steel deck installation. For temporary and reusable applications on flat and low-slope wood and steel roofing and decking.

Pitched roof rotating SRL anchor features adjustable cradle for DuraTech® and most SRL brands up to 60’. Includes 1½” lag screws for temporary and reusable over-ridge installation on pitched wood roof trusses with sheathing.

Permanent Roof Ridge Twin-D anchor features 9½” stainless steel nailing plate with 2½” connecting D-ring and 3” Grade 5 lag screws for roof ridge installation on wood roof structures.
**ANCHORAGES**

**MUTIPURPOSE // ANCHORAGES**

**7214 | Scaffold Choker**

Temporary

17” cinch-loop scaffold choker anchor features 1” polyester web with connection D-ring for temporary reusable choke-on installation to properly rated structures. Manageable length is ideal for short-reach applications common with scaffolds and towers.

**7236 | Cinch-loop Web Choker**

Temporary

3’ cinch-loop web choker anchor features 1¾” heavy weight polyester web with connection D-ring for temporary reusable installation on properly rated structures. Familiar cinch-loop design provides easy choke-on attachment.

**7336 | Pass-through Web Choker**

Temporary

3’ pass-through web choker anchor with 1¾” load-bearing web and 3” wide wear pad for temporary reusable applications on properly rated structures. Large and medium size D-rings allow simple pass-through choke-on installation leaving smaller D-ring as connection point for lanyards or SRLs.

**72493FT | Arc Flash Cinch-loop Choker**

Temporary

3’ Arc Flash cinch-loop choker anchor features 1¾” Kevlar® web and overmold insulated D-ring for advanced Arc Flash hazard protection. Cinch-loop design provides temporary and reusable choke-on installation on properly rated structures.

**72494FT | 6’ Arc Flash Cinch-loop Choker**

Temporary

2’ Overhead Drop-through anchor features ¼” vinyl coated galvanized steel cable with 1” swiveling connection eye and 6” x 6” steel plate that suspends cable through 1” min to 3” max hole diameter. For temporary and reusable installation through overhead holes in steel and concrete.

**MULTIPURPOSE // ANCHORAGES**

**7214 | Scaffold Choker**

Temporary

17” cinch-loop scaffold choker anchor features 1” polyester web with connection D-ring for temporary reusable choke-on installation to properly rated structures. Manageable length is ideal for short-reach applications common with scaffolds and towers.

**7236 | Cinch-loop Web Choker**

Temporary

3’ cinch-loop web choker anchor features 1¾” heavy weight polyester web with connection D-ring for temporary reusable installation on properly rated structures. Familiar cinch-loop design provides easy choke-on attachment.

**7336 | Pass-through Web Choker**

Temporary

3’ pass-through web choker anchor with 1¾” load-bearing web and 3” wide wear pad for temporary reusable applications on properly rated structures. Large and medium size D-rings allow simple pass-through choke-on installation leaving smaller D-ring as connection point for lanyards or SRLs.

**72493FT | Arc Flash Cinch-loop Choker**

Temporary

3’ Arc Flash cinch-loop choker anchor features 1¾” Kevlar® web and overmold insulated D-ring for advanced Arc Flash hazard protection. Cinch-loop design provides temporary and reusable choke-on installation on properly rated structures.

**72494FT | 6’ Arc Flash Cinch-loop Choker**

Temporary

2’ Overhead Drop-through anchor features ¼” vinyl coated galvanized steel cable with 1” swiveling connection eye and 6” x 6” steel plate that suspends cable through 1” min to 3” max hole diameter. For temporary and reusable installation through overhead holes in steel and concrete.
When it comes to your fall protection equipment, there’s nothing more personal, essential or important than your full body harness. While FallTech harnesses are built to meet or exceed ANSI standards and OSHA regulations, we’ve also designed comfort, support and accessibility into our body wear with continued freedom of movement, sustained safety and productivity for workers at height.

**ADVANCED COMFORT® GEL**
- Exclusive Comfort-GEL endoskeleton, dorsal SRL attachment sleeve and aluminum camlock torso adjusters.
- Forged aluminum D-rings, Quick Connect buckles and cool-vent lumbar zone

**FLOWTECH® LTE**
- Proprietary FlowScape venting channels, dorsal SRL attachment sleeve and aluminum camlock torso adjusters.
- Forged aluminum D-rings, moisture wicking mesh lining and twist-indicating 2-sided webbing.

**JOURNEYMAN FLEX ALUMINUM**
- Unique ergonomic reinforced waist support and positioning pad, dorsal SRL attachment sleeve and aluminum camlock torso adjusters.
- Forged aluminum D-rings, contoured hip-to-seat leg pads and Quick Connect buckles.

**JOURNEYMAN FLEX STEEL**
- Preferred padding enhanced throughout shoulders and waist, dorsal SRL attachment sleeve and contoured hip-to-seat leg pads.
- Traditional low-profile spring-tension torso adjusters, forged alloy steel D-rings and Quick Connect buckles.

**TRADESMAN PLUS**
- Exclusive dorsal SRL attachment sleeve, tri-layer padded air-mesh shoulder yoke and Quick Connect chest buckles.
- Traditional low-profile spring-tension torso adjusters, reinforced waist support and positioning pad and paired lanyard parking keepers.

**TRADESMAN**
- Established features include forged alloy steel D-rings, friction roller torso adjusters, independent 10” shoulder pads and 9 adjustment position belt on Construction models.

**CONTRACTOR PLUS**
- Exclusive dorsal SRL attachment sleeve, breathable padded air-mesh shoulder yoke and stabilized waist support positioning pad.
- Mating Buckle chest closures, low-profile spring-tension torso adjusters and paired lanyard parking keepers.

**CONTRACTOR**
- Established features include Mating Buckle torso adjusters, stamped steel D-rings, independent 7” shoulder pads and 9 adjustment position belt on Construction models.
Proven end-user acceptance for unsurpassed comfort has made ComforTech® full body harnesses the preferred choice of body wear solutions they are today. A decade of growth later, the evolution of comfort continues with exclusive premium features and enhanced comfort provided with Advanced ComforTech® GEL.

### FEATURES

1. Proprietary gel endoskeleton.
2. Exclusive aluminum camlock adjusters.
3. Dorsal SRL attachment sleeve.
4. Tool fether connection rings.
5. Forged aluminum D-rings.
6. Integral Suspension Trauma Relief System (select models).

FEATURES

1. Dorsal SRL attachment sleeve.
2. Proprietary Flowscape® air channel padding.
3. Exclusive aluminum camlock adjusters.
4. Tool tether connection rings.
5. Triple-lock Quick Connect leg buckles (select models).

FLOWTECH® LTE Lightweight breathability is the result of user demand embodied in FlowTech® LTE full body harnesses. Redesigned proprietary Flowscape® pad technology provides unrivaled performance in transferring body heat away from the user through advanced evaporative breathability. Coupled with aluminum hardware components throughout each harness, these are the essentials comprising the foundation of FlowTech® LTE.

Tradesman Plus harness enhancements incorporate nearly 20 years of end-user acceptance, productivity and manufacturing proficiency as the standard of day-in day-out performance and reliability. Serviceable functionality and trusted quality are built upon with added user benefits to last all day and every day without imposing a premium expense.

**Features**

1. Dorsal SRL attachment sleeve.
2. Quick-Connect chest buckles.
3. Tri-layer padded shoulder yoke.
4. Reinforced comfort waist support pad.
5. Low-profile spring-tension adjusters.

*UniFit (Small, Medium, Large) S/M and L/X: Dual Sizes*
Providing reliable performance and safety with economical function has been the mainstay of Contractor series harnesses since 2005. Our upgraded Contractor Plus harnesses also deliver the same compliance-grade foundation with practical and effective advances for improved user productivity in most all common worksite applications.

FEATURES

1. Dorsal SRL attachment sleeve.
2. Breathable comfort shoulder yoke.
3. Reinforced comfort waist support pad.
4. Low-profile spring-tension adjusters.

SPECIALTY BODY WEAR

In addition to our full complement of multi-function harnesses structured to meet traditional fall arrest, work positioning and climbing applications, our expanded range of specialty harnesses address task and environment specific applications for welding, tower climbing, utilities, oil and gas and traffic.

ARC FLASH
Overmold insulated D-rings, Mating and Quick Connect buckles and traditional leather insulators.
Solutions provided with Nomex or Kevlar webbing, and without flame resistant shoulder, waist and leg pads and dorsal D-ring or loop options.

WEALTITECH
Standard Non-belted and Crossover Climbing models available with Nomex webbing and one to four alloy steel D-rings.
Offered with Quick Connect or Mating Buckle chest and leg closures and grommeted Kevlar legs with Tongue Buckles.

HIGH-VIZ VEST
Class 2 and Construction Grade safety vest options feature vest-cut design for improved access to user’s pants pockets and are both available in high-visibility lime and orange breathable mesh fabric.
Class 2 vests are paired with 3-D harnesses with Tongue Buckle legs and feature zippered side vents for access to Hip D-rings and include zippered front and rear pockets.
Construction Grade vests are paired with 1-D harnesses with Mating Buckle legs and include four front pockets.

ROUGHNECK®
Harness configurations provide solutions for Fall Arrest, Work Positioning, Climbing, Restraint, Riding/Lifting and Suspension applications common in derrick work.
Available in Bosun Belted, Crossover Climbing, Derrick Construction and Derrick Non-belted models.
Recognized features include integral Seat Board or Sling Seat for suspension, Dorsal D-ring extensions, Hip-lifting D-rings, Restraint D-rings and attachment buckles for Belly Belts.

TOWER CLIMBER®
User-preferred configurations with six D-rings for Fall Arrest, Work Positioning, Climbing and Suspension applications common in most all tower climbing work.
ComforTech and FlowTech climbers feature padded, adjustable and detachable suspension seats reinforced with internal aluminum support bars and Quick Connect chest buckles.
ComforTech® climbers include steel D-rings and Tongue Buckle legs while FlowTech® climbers feature aluminum D-rings and Quick Connect legs.

POSITIONING AND WORK BELTS
Designed for Work Positioning and Fall Restraint applications and, for providing added lumbar support as a separate component of a Personal Fall Arrest or Work Positioning System. Available for integration with most full body harnesses.
Work Belts are ideally suited for replacement on Construction Belted harnesses, adding functionality to non-belted harnesses and for stand-alone use to support heavy tool bags.
FallTech Arc Flash harnesses protect workers in a fall event following electric arc flash and arc blast exposure when working at heights or in confined spaces near electrically charged sources. Available in user-preferred flame-resistant Nomex webbing, with and without comfort pads, and options featuring premium overmold hardware and traditional leather insulation. ASTM F887-13 and ANSI Z359.11-2014 compliant.

**FEATURES**

1. Premium overmold insulation on steel hardware.
2. Overmold Quick Connect buckles (select models).
4. Nomex®/Kevlar® blended webbing throughout torso, legs and belt.

*7042 and 7056 are available in two styles with Hip D-rings for positioning and with a single Waist D-ring for restraint. A variety of waist support pads and removeable or fixed belt options are available for frequent and occasional use.*

### Items

- **7042** Journeyman Tower
  - Six D-rings
  - Sizes S to XL

- **7056** FlowTech® Tower
  - Six D-rings
  - Sizes S to XL

### Applications
- **FallTech® Body Belts** are designed for use in Work Positioning and Restraint applications and for integration with most full body harnesses. Available in two styles with Hip D-rings for positioning and with a single Waist D-ring for restraint. A variety of waist support pads and removable or fixed belt options are available for frequent and occasional use.

### 7055 Standard Positioning
- **Two D-rings**
- Sizes S to 2X
- Features 4" bonded waist support pad with heavy-duty removable work belt.

### 7055B Premium Positioning
- **Two D-rings**
- Sizes S to 2X
- Features 6" molded waist support pad with heavy-duty removable work belt.

### 7056 Premium Positioning
- **Two D-rings**
- Sizes S to XL
- Features 4" bonded waist pad with 3" web support band and heavy-duty removable work belt.

### 7060 Web Positioning
- **Two D-rings**
- Sizes S to XL
- Features 3" waist support web with heavy-duty fixed work belt.

### 7090 Restraint Belt
- **Single D-ring**
- Sizes S to 3X
- Features 4" bonded waist support pad with heavy-duty fixed work belt.

### 7094 Work Belt
- **Two D-rings**
- Sizes S to 2X
- Features aluminum buckle with 7 adjustment positions.

### 7095 Work Belt
- **Two D-rings**
- Sizes XS to 4X
- Features plated steel buckle with 7 adjustment positions.

### 7004Y Shoulder Yoke
- **UnifiT size fits most harnesses**
- Features 6" molded waist support pad with heavy-duty removable work belt.

### 7004F Shoulder Yoke for Arc Flash
- **5001: Memory-Foam Shoulder Yoke.**

### 7004L Shoulder Pads
- **UnifiT size fits most harnesses**
- Independent pads fit most harnesses

### 5003 Leg Pads
- **Memory-Foam fits most harnesses**

### 5034P Arc Flash Sub-pelvic Leg Pads
- **Adjustable length step-in loop assembly will accommodate both users feel to relieve pressure. UnifiT design fits most harnesses with choke-on/snap fastener installation. Features integral thumb loops for quick deployment after a fall event.**

### 5040 Suspension Trauma Relief
- **Adjustable length step-in loop assembly will accommodate both users feel to relieve pressure. UnifiT design fits most harnesses with choke-on/snap fastener installation. Features integral thumb loops for quick deployment after a fall event.**

### 5066 Lanyard Keepers
- **2/pk UnifiT size fits most harnesses.**

QUICK REFERENCE GUIDE
Please refer to this chart to get a general idea of your FallTech harness size.

1. **TORSO STRAP**
   - Measure from 3 inches left of navel.
   - Measure around the waist just under the navel.

2. **LEG STRAP**
   - Measure the circumference around the thigh from the crotch to underneath the hip bone.

3. **WAIST BELTS**
   - Measure the circumference around the waist just under the navel.

DETAILED REFERENCE GUIDE
Because your harness is the most important element of any personal fall arrest system, it must fit properly to deliver the highest level of safety. After you select your FallTech harness, follow these three simple steps to find your exact size.

**ALL MEASUREMENTS ARE TO BE TAKEN OVER CLOTHING**

1. **TORSO STRAP**
   - Measure from 3 inches left of navel, upward over left shoulder towards lower right side of back.

2. **LEGS STRAP**
   - Measure the circumference around the thigh from the crotch to underneath the hip bone.

3. **WAIST BELTS**
   - Measure the circumference around the waist just under the navel.

Please refer to this chart to get a general idea of your FallTech harness size.
CONNECTORS

FALLTECH’s wide range of connectors for fall arrest, work positioning and restraint applications is built on years of dependable construction, performance and quality through rigorous testing and by directly addressing the needs of the end-user. From ElasTech® to Ironman® for rebar and rope positioning plus lifelines, extenders and carabiners, when you need to be connected, you have the right equipment for the job.

Ironman® Dual-class Energy Absorbing Lanyards are the essential user solution to address changing worksite anchorage conditions by providing the deceleration to effectively arrest average fall forces experienced in both overhead/6’ and foot level/12’ Free Fall conditions for users weighing up to 310 lbs. Max. Supported in two user-preferred platforms with either elasticated or fixed-length legs including snap and rebar hooks in steel and aluminum plus, integrated SRL and Rescue D-rings available on select models. Additionally, heavier users weighing between 310 and 425 lbs. may also utilize Ironman® lanyards in overhead/6’ Free Fall conditions.

Ironman® Dual-class Energy Absorbing Lanyards deliver problem solving solutions for both overhead/6’ and foot level/12’ Free Fall conditions. Available in single and double-leg configurations, Ironman® lanyards are also suitable for heavier users between 310 and 425 lbs for OSHA 6’ Free Fall conditions when connected to overhead anchorages. All Ironman® lanyards meet ANSI Z359.12-2013.
100% tie-off Ironman® Lanyard with jacketed dual-layer polyester fixed-length web legs, steel snap hook for harness attachment and steel rebar hooks for anchorage connections.

8247BA: Single-leg Lanyard with steel snap hook for harness and anchorage connection.

100% tie-off Ironman® Lanyard with jacketed dual-layer polyester fixed-length web legs, steel snap hook for harness attachment and steel rebar hooks for anchorage connections.

8247BY: 100% tie-off Ironman® Lanyard with steel snap hook for harness and anchorage connections.

Traditional pack-style energy absorbing lanyards with extraordinary features including our patented ViewPack® cover with inspection window and WrapPack design to fully protect the enclosed product and inspection labels. All are built with abrasion and UV resistant polyester webbing, 1/4” vinyl coated galvanized cable or 5/8” 3-strand polyester rope and feature forged alloy steel or aluminum alloy harness and anchorage connectors.

82608: 100% tie-off Tie-back Lanyard with jacketed dual-layer polyester web, steel snap hook for harness attachment and steel snap hooks with sliding D-rings for tie-back anchorage connections.

826073: 100% tie-off lanyard with polyester web and steel snap hooks for harness and anchorage connections.

826073A: 3’ 100% tie-off lanyard.

826073B: 4’ 100% tie-off lanyard.

Ironman® Lanyard with jacketed dual-layer polyester fixed-length web leg, steel snap hook for harness attachment and steel rebar hook for anchorage connection.

8247B3: Lanyard with steel snap hooks for harness and anchorage connection.

100% tie-off Ironman® Internal Lanyard with full-length internal energy absorber, steel snap hook for harness attachment and steel rebar hooks for anchorage connections.

8247Y: 100% tie-off Ironman® Lanyard with steel snap hook for harness and anchorage connection.

100% tie-off lanyard with jacketed dual-layer polyester web and steel snap hook for harness attachment and steel rebar hooks for anchorage connections.

8247Y3: 100% tie-off lanyard with steel snap hook for harness and anchorage connections.

100% tie-off Ironman® Internal Lanyard with steel snap hooks for harness and anchorage connection.

8247Y3A: 6’ Double-Leg

Transverse Load rated rebar hooks

100% tie-off Ironman® Lanyard with jacketed dual-layer polyester fixed-length web legs, aluminum snap hook for harness attachment and aluminum rebar hooks for anchorage connections.

ElastTech®

All ElastTech® lanyards feature abrasion and UV resistant tubular polyester webbing and a full-length internal energy absorber allowing it to maintain its low-profile and flexible design. Coupled with a high-modulus internal elastic, each leg will expand and contract from 4½’ to 6’ with the user’s movement and help to reduce snagging and tripping hazards. All lanyards include forged alloy steel or aluminum alloy harness and anchorage connectors (except where noted for choke-loop harness attachments).

ENERGY ABSORBING LANYARDS // CONNECTORS

Internal

The FallTech® Internal series is the end-user’s preference for familiar fall arrest applications and our most economical energy absorbing lanyard. Featuring abrasion and UV resistant tubular polyester webbing and full-length internal energy absorbers, our Internal lanyards maintain the lowest profile and lightest weight available and all feature forged alloy steel harness and anchorage connectors (except where noted for choke-loop harness attachments).

8259Y3 | Internal Lanyard
6’ Double-Leg

8259Y3L: Lanyard with choke-loop for harness attachment.
8259Y: Lanyard with steel snap hooks for harness and anchorage connections.

Soft Pack

Soft Pack energy absorbing lanyards provide a low cost option for those preferring a pack-style lanyard. All Soft Pack series lanyards are constructed with 100% polyester webbing throughout including UV and abrasion resistant leg web, tear-away energy absorber and Soft Pack cover. Additionally, all lanyards feature forged alloy steel snap and rebar hooks for harness and anchorage connections (except where noted).

8256LT3 | Soft Pack Lanyard

8256LY3: Lanyard with steel snap hook for harness attachment and steel rebar hooks for anchorage connections.

Leading Edge

FallTech® Leading Edge cable lanyards boast the combined protection of featuring ¼” coated galvanized steel cable legs and our ViewPack® Dual-class 12’ Free Fall energy absorber. The cable legs provide cut and abrasion resistance in work conditions with sharp and leading edges, and the 12’ Free Fall energy absorber is ideally suited for foot-level tie-off. Not only built for users weighing up to 310 lbs. in both overhead and foot-level conditions, heavier users weighing up to 425 lbs. may also utilize our Cable LE lanyards in overhead/6’ Free Fall conditions. Available with forged alloy steel and aluminum alloy snap and rebar hook options.

8354LE: Lanyard with steel snap hooks for harness and anchorage connection.

For specialty conditions and applications, FallTech® provides a range of solutions to meet those needs. WrapTech® lanyards eliminate the need for a separate anchor tie-off point by featuring a 5,000 lb. gated carabiner and double-layer jacketed web. Our Heavyweight® Internal series lanyards provide ample fall force protection well under the OSHA limit for overhead anchorage by users weighing between 310 lbs. up to 425 lbs., and our coated-series lanyards feature a flexible urethane coating to deliver protection to the polyester leg webbing within and provide easy clean-up, water resistance and long-life in the harshest environments.

Energy absorbing lanyards // Connectors

All FallTech® restraint lanyards provide a simple and effective fall prevention function, to keep users from reaching fall hazards. Available in a wide range of preferred fixed lengths and materials including abrasion resistant polyester web, coated and uncoated galvanized steel cable and 3-strand polyester rope. Our adjustable restraint lanyards are built with double-layer polyester web for general purpose use and Kevlar® web options for Arc Flash and hot work welding applications.

Rebar Positioning

FallTech® rebar positioning lanyard assemblies are built to meet the daily challenges faced in elevated concrete form work and rebar wall construction and provide the user with the support needed to confidently work with both hands free. A wide range of configurations are available with Grade 80 welded-link chain or double-layer web constituents, alloy steel and aluminum alloy hip D-ring connectors with swiveling and standard rebar hooks for vertical rebar connection.

Rope Positioning

Tower Climber® rope positioning lanyards provide light weight and adjustable length in hands-free work applications. All lanyards include an auto-locking one-hand operation aluminum rope adjuster and two integral connectors for balanced weight distribution on the hip D-rings. Available in 6½’ and 10’ lengths, all lanyards feature 7/16” nylon kernmantle rope with sewn terminations on both ends and a 23” tubular sheath for abrasion resistance. Connector options include alloy steel and aluminum alloy snap hooks and carabiners plus, a no-connector option for those who prefer to integrate their own.

Arresters and Adjusters

FallTech® provides a wide range of Rope Adjusters and Full Arresters for user ascent and descent mobility while maintaining continuous vertical anchorage on 5/8" rope lifelines. Offered separately and with pre-attached 3' energy absorbing lanyards, our range of options includes manually operated and trailing devices with user-preferred functions including hinged and anti-inversion models and, to meet ANSI Z359.15 Standards, the anti-panic function provides the safest user solution available.

81200DH: 100' lifeline with two snap hooks.
8149T: 50' lifeline with taped trailing end.
FallTech® D-ring extenders provide extra length to the Dorsal D-ring making it easier for users to connect SRLs and energy absorbing lanyards and, are available for a wider range of applications with configurations and lengths to accommodate user’s specific needs and reach. Our offering of carabiners deliver high strength reliability for multi-use multi-purpose connecting of fall arrest components and are available in both forged alloy steel and aluminum alloy in varied sizes. All FallTech carabiners feature self-closing self-locking gates with 3,600 lbs. face and side load strength.

FallTech® offers a full range of self-retracting lifeline solutions to meet nearly every user requirement and, for a wide range of applications. Whether the user is in construction, utilities maintenance or general industry or, the installation is overhead, at foot-level or personally attached to the harness, DuraTech® and Contractor SRLs provide durable performance and reliability that's supported with documentation to meet all industry standards.

**DuraTech® SRLs**

When there’s no margin for error on your job, DuraTech SRLs deliver quick stopping power with minimal force on the body and anchorage. Meeting the industry’s highest standards, DuraTech® SRLs bring consistent performance to the most challenging work environments.

DuraTech overhead and leading edge SRLs feature side-payout aluminum housings, load-indicating swivel snap hooks and recoil spring hand-grip lifelines combined with internal inertial brakes. Additionally, Leading Edge SRLs include an integral external ViewPack® energy absorber and 7/32” cable to reduce the risk of lifeline failure when contacting a sharp leading edge and may also be used in overhead applications.

**Contractor SRLs**

Contractor SRLs provide economical fall arrest solutions without compromising on safety or performance. Fully featured and built to last, Contractor SRLs deliver the value and functionality users expect and demand from FallTech.

**Compact Overhead SRLs**

DuraTech® compact web and cable SRLs bring the same dependable overhead performance as larger units and, provide excellent user mobility. Internal inertial brakes and locking pawls support smooth deceleration and positive stopping action.

**Personal Mini SRLs**

FallTech Mini SRLs deliver Fall-Arrest performance beyond the capabilities of traditional energy absorbing lanyards. WrapTech® Tie-back SRLs provide wrap-around anchorage connection eliminating the need for a separate anchorage connector.

**DuraTech® SRLs**

DuraTech® Personal SRLs deliver uncommon durability with uncompromised performance. DuraTech® 6' SRL board shorter arrest distances for a wider range of work locations and, DuraTech® 9’ Max SRLs allow increased user weight capacity plus, a greater anchorage distance below the user’s dorsal D-ring.

Both DuraTech® SRLs feature internal inertial brakes and locking pawls to produce smooth deceleration and positive stopping action and nylon overmold housings that provide unmatched impact resistance. 6’ DuraTech® SRLs may be anchored up to 2’ below the dorsal D-ring for user’s weighing up to 310 lbs. max. 9’ Max SRLs may be anchored up to 5’ below the dorsal D-ring for users weighing up to 310 lbs. max while complying with ANSI and, up to 425 lbs. max user weight under OSHA regulations.

When there’s no margin for error on your job, DuraTech SRLs deliver quick stopping power with minimal force on the body and anchorage. Meeting the industry’s highest standards, DuraTech® SRLs bring consistent performance to the most challenging work environments.
FallTech’s DuraTech® Leading Edge SRLs deliver the highest level of fall safety when facing common construction site unprotected sides and edges specifically, sharp leading edges. All DuraTech® Leading Edge SRLs have been thoroughly tested to the demanding ANSI Z359.14-2014 LE Standards developed specifically for leading edge performance. All Leading Edge SRLs may be utilized for traditional overhead anchorages and for below D-ring applications common when facing leading edge hazards.

**FEATURES**

1. Side-payout cable orifice.
2. Stackable aluminum housing design.
3. Patented ViewPack® energy absorber cover.
4. Recoil Spring hand-grip assembly.
5. Load-indicating swivel snap hook.
6. 7/32” galvanized steel cable.

**7232CLE | DuraTech® 30’ LE SRL**

US Patent #9,498,659

**7265CLE | DuraTech® 60’ LE Cable SRL**

Galvanized

**7268C | DuraTech® 50’ Cable SRL**

Galvanized

DuraTech® Leading Edge SRLs are designed for both overhead and below D-ring anchorage applications featuring an integrated external energy absorber to enhance the internal braking system and preserve lifeline integrity and a rugged 7/32” galvanized steel cable to resist cuts over sharp and abrasive leading edges. Equipped with a Recoil Spring hand-grip assembly to help prevent lifeline lock-up and provide simple dorsal connection plus, a load-indicating swivel snap hook to provide visual fall event indication and help prevent lifeline twisting. The side-payout housing design produces smooth operation and reduces nuisance lock-up and comes outfitted with an extra large steel anchorage carabiner.

Our improved DuraTech® C-series SRLs also feature the new side-payout housing for uniform operation and reduced wear on the orifice and provides a stackable design for easy storage. Furnished with an internal braking system that delivers positive deceleration, durable 3/16” galvanized steel cable lifeline with load-indicating swivel snap and our Recoil Spring hand-grip assembly helps prevent accidental user lock-up.
7268CS | DuraTech® 50' Cable SRL

Stainless Steel

DuraTech® CS-series SRLs include all the same features and improvements created in the C-series however these SRLs feature 3/16” stainless steel cable lifelines. Additionally, we also offer CS20-series SRLs with additional stainless steel components including the load-indicating swivel snap hook and the internal pressure plate. All CS and CSS-series SRLs deliver the added corrosion resistance users require in harsh environments.

Contractor

Dependable functionality without compromise for safety, Contractor series SRLs afford the user with reliable and cost-effective solutions for fall arrest applications. Field-use verified and thoroughly lab tested, Contractor SRLs exceed all industry performance standards including ANSI Z359.14. All Contractor SRLs feature rugged glass-filled nylon housings, internal inertial brake systems, load-indicating swivel snap hooks and anchorage carabiners.

8' Overhead Reactor

The FallTech® Overhead Reactor highlights an internal steel frame with PVC cover, integral steel swivel and anchorage carabiner, and a polyester web lifeline with alloy steel snap hook.
DuraTech® Mini SRLs are a recognized replacement for traditional energy absorbing lanyards and provide added user benefits that lanyards cannot deliver. The most important of these benefits is the user’s reduced minimum fall clearance which in turn supports the use in more applications. Available in single and twin leg configurations for overhead and dorsal D-ring attachment, DuraTech® Mini personal SRLs are versatile, lightweight and sensibly affordable solutions for most all personal fall arrest systems.

**FEATURES**

1. Dorsal-connect carabiner with alignment clip.
2. Integral housing swivel-eyes.
3. Impact resistant nylon housing.
4. Patented ViewPack® energy absorber cover.
5. Abrasion resistant Dyneema® web lifeline.
6. Steel and aluminum lifeline-end connectors.

72706TB3 | DuraTech® Mini 6' Web SRL

72706TH5 | DuraTech® Mini 6' SRL

DuraTech® Mini 6' Web SRLs deliver fall arrest performance beyond the capabilities of traditional energy absorbing lanyards. Featuring impact resistant nylon housings, long-wearing Dyneema® web and housing swivel-eyes to reduce lifeline twisting.

All DuraTech Mini SRLs include internal locking pawls and external energy absorbers for deceleration in the event of a fall. Available in single and twin-leg configurations for 100% tie-off with multiple alloy steel and forged aluminum alloy anchorage and harness-end connector options. DuraTech Mini’s may be anchored up to 5’ below the dorsal D-ring for user’s weighing up to 310 lbs. max.

DuraTech®

DuraTech® 6’ SRLs provide enduring performance with uncompromised durability. Internal inertial brakes and locking pawls produce smooth deceleration and stopping action in a fall event. The absence of external energy absorbers on DuraTech 6’ SRLs means reduced minimum required fall clearances for the user and therefore a wider range of work locations may apply. Glass-reinforced housings with TPR overmold provide unmatched impact resistance and aluminum housing swivel-eyes help prevent lifeline twisting. The Dyneema® web lifeline resists abrasion and includes a visual fall event indicator. DuraTech® 6’ SRLs are available in single and twin-leg configurations with multiple alloy steel and forged aluminum alloy connectors, and may be anchored up to 2’ below the dorsal D-ring for user’s weighing up to 310 lbs. max.

82706SB1 | DuraTech® 6’ Web SRL

82706TB3 | DuraTech® 6’ Web SRL

DuraTech®

DuraTech® Max SRLs provide unmatched versatility through their maximum user weight capacity and working length. Internal inertial brakes and locking pawls combined with the external energy absorbers deliver unequaled fall arrest performance. This unique braking deceleration pairing allows 9’ Max SRLs to be anchored up to 5’ below the dorsal D-ring for users weighing up to 425 lbs. max. for compliance within OSHA regulations.

Glass-reinforced housings with TPR overmold provide unmatched impact resistance and aluminum swivel-eyes help prevent lifeline twisting. The Dyneema® web lifeline resists abrasion and includes a visual fall event indicator. DuraTech® Max SRLs are available in single and twin-leg configurations with multiple alloy steel and forged aluminum alloy connectors.

Glass-reinforced housings and aluminum swivel-eyes to help prevent lifeline twisting.
FallTech’s UniDrive Rescue and Descent device provides users with the most functional and efficient operation available for use in installation and maintenance of cell towers, construction cranes, wind energy turbines and in many other elevated commercial work locations. Delivering not only self and assisted rescue and controlled descent escape solutions, the UniDrive also provides vertical work lifting capabilities where others do not. The UniDrive device is designed for both overhead anchoring and personal external attachment for self and assisted rescue operations and provides the user with three lifting modes: the manually operated handwheel, a telescoping ratchet handle and a power drill adapter are all standard equipment. Available in prepacked user kits with 150’ and 300’ lifelines.

Edge Protector features stainless steel plate and guides with 5’ wide leather and aluminum carabiner for rope lifeline protection over abrasive edges.
Confined spaces can be found on many job sites and in nearly every industry where workers come into contact with at least one during the course of their work. Having restricted or limited means of entry and egress, confined spaces are by nature, not designed for continuous occupancy and therefore present a wide range of hazardous conditions to the worker. Commonly used to raise and lower personnel in confined vertical work spaces, davit and tripod systems are essential components of any Confined Space Entry and Retrieval plan. For these reasons, our provision toward mitigating these hazards offers a variety of durable, portable and reliable davit and tripod solutions for safe planning, entry, egress and retrieval.

---

**THE RIGHT EQUIPMENT FOR THE JOB**
FallTech® 5pc. Davit Systems are an essential part of a confined space entry and rescue retrieval plan and accordingly are offered in preferred combinations with and without mechanical devices. Designed for vertical entry in temporary applications, our davit systems are lightweight and decidedly portable for trouble-free movement to varied access locations as required. FallTech® 5pc. systems are built for demanding performance with powder coated aluminum offset davit arms, mast extensions and adjustable bases plus all include a host of standard features including primary and secondary pulleys, multiple anchor points and fully adjustable base width, leg and mast height and offset arm reach.

FEATURES

1. Telescoping adjustment from 12” to 29”
2. Primary and secondary pulleys
3. Integral secondary anchor point with 5,000 lbs. rated strength
4. Mast-mounted device Receiver Bracket
5. Adjustable legs with orbiting foot pads
6. Adjustable base with multiple presets

FaTech’s modular compilation of functional base components combined in a portable system with winches and SRL-R’s, allow you to work with confidence in Confined Space Entry and Retrieval applications and maintain the flexibility to modify the system to meet your needs. Lightweight aluminum blended with rugged steel elements throughout, our 5pc. Davit Systems operate with full adjustability and lasting performance.

**6050428WR** | 5pc. Davit System with Winch and SRL-R

- Portable system features offset davit arm, 3pc. base and 33” lower mast extension. Offset davit arm adjusts from 12” to 29” and base width adjusts from 38” to 65”. Includes 60' 3-way SRL-R and Personnel Winch with galvanized steel cable. Also includes mast-mounted device receiver brackets for FallTech® devices.

**6050328R** | 5pc. Davit System 60’ SRL-R

- Portable system features offset davit arm, 3pc. base, 33” lower mast extension and 60’ SRL-R with galvanized steel cable and mast-mounted receiver bracket.

**6050228W** | 5pc. Davit System 60’ Winch

- Portable system features offset davit arm, 3pc. base, 33” lower mast extension and 60’ Personnel Winch with galvanized steel cable and mast-mounted receiver bracket.

**6050128** | 5pc. Davit System User-supplied Devices

- Portable system features offset davit arm, 3pc. base, 33” lower mast extension and mast-mounted receiver bracket. Requires user-supplied retrieval devices.

Temporary horizontal lifeline systems provide uniquely adjustable anchorage solutions for mobile users and support varied work site applications with changing fall clearance requirements. Available in synthetic rope and steel cable constituents for 2 to 4 users in various preferred lengths, with and without end-point anchorage connectors.

**Synthetic Lifelines**

- 2-person Nylon Kernmantle
- 4-person Double-braid polyester

**Steel Cable Lifelines and Components**

- Cable Systems
- Energy Absorber
- Tension Indicator

**Steelgrip® I-Beam Components**

- I-beam Stanchion
- Adjustable Clamps
- Base Assembly
- Pass-through bracket
**TEMPORARY HORIZONTAL LIFELINE SYSTEMS**

Providing continuous anchorage solutions for mobile users working along horizontal surfaces, FallTech® offers synthetic rope and steel cable horizontal lifeline system options that are not only adjustable in length and simple to install, they also meet the varied fall clearance conditions for construction and general industry applications alike. All systems are designed for temporary use and deliver high strength durability, reliable performance and flexible portability.

---

**FEATURES**

1. Clamp and wing nut installation.
2. Intermediate stanchion pass-through bracket.
3. Integral welded carry handle.
4. Stainless steel coil energy absorber.
5. Cable lifeline tension indicator.

---

FallTech® Synthetic Horizontal Lifelines provide a flexible, lightweight and adjustable anchorage solution offering quick installation and portability for users working in the absence of individual anchorages along a horizontal surface. FallTech® synthetic lifeline systems are made available in various adjustable lengths from 30’ to 100’, for 2 to 4 users and are designed for temporary use in most construction and general industry job site conditions.

---

**SYNTHETIC LIFELINES // TEMPORARY HORIZONTAL SYSTEMS**

**77602K** | 2-person HLL System

- 60’ temporary system for up to two users features 11/16” solid-core nylon kernmantle rope with 12,000 lbs static strength. Complete system includes lifeline, tensioner, energy absorber and storage bag with two each carabiners, connecting rings and 6’ pass-through choker anchors.

- **77302K**: 30’ kernmantle HLL System.
- **771002K**: 100’ kernmantle HLL System.

---

**777075** | 4-person HLL System

- 75’ temporary system for up to four users features 5/8” double-braided solid-core polyester rope with 9,000 lbs static strength. Complete system kit includes lifeline, tensioner and storage bag with two carabiners and 6’ pass-through choker anchors plus four connecting rings.

- **777300**: 30’ double-braided HLL System.
- **777500**: 50’ double-braided HLL System.
- **777100**: 100’ double-braided HLL System.

---

**777030** | 30’ double-braided HLL System.

**777050** | 50’ double-braided HLL System.

**777100** | 100’ double-braided HLL System.

---

**770001** | 100’ hollow-core HLL System

**770003** | 30’ hollow-core HLL System.

---

**Clamp and wing nut installation.**

**Intermediate stanchion pass-through bracket.**

**Integral welded carry handle.**

**Stainless steel coil energy absorber.**

---

**6038012** | SteelGrip® 80’ Cable HLL System

FallTech® Synthetic Horizontal Lifelines provide a flexible, lightweight and adjustable anchorage solution offering quick installation and portability for users working in the absence of individual anchorages along a horizontal surface. FallTech® synthetic lifeline systems are made available in various adjustable lengths from 30’ to 100’, for 2 to 4 users and are designed for temporary use in most construction and general industry job site conditions.
FallTech® Rooftop Horizontal Lifeline Kits provide a lightweight and adjustable span anchorage system for users preferring a continuous length solution along a roof ridge as opposed to installing multiple single anchors. All FallTech® Rooftop systems include a pair of specially roof anchor options including dual truss or chain anchors designed for temporary use by 2 to 4 users with 50’ and 60’ lengths available to fit changing ridge line lengths.

FallTech® SteelGrip® Horizontal Lifelines provide an adjustable length and portable anchorage solution for users working in the absence of proper anchorages along a horizontal surface. All SteelGrip® systems are designed for temporary use and are available with end-point anchorage options in various precut lengths for manageable on-site adjustment to match construction job site conditions.

FallTech® Rooftop Horizontal Lifeline Kits include:
- SteelGrip®® 60’ Cable HLL
- SteelGrip®® 60’ Cable Assembly
- SteelGrip®® 60’ Cable HLL System kits include:
  - Lifeline, tensioner, energy absorber and storage bag with carabiners and connecting rings.

FallTech® SteelGrip® Horizontal Lifelines provide an adjustable length and portable anchorage solution for users working in the absence of proper anchorages along a horizontal surface. All SteelGrip® systems are designed for temporary use and are available with end-point anchorage options in various precut lengths for manageable on-site adjustment to match construction job site conditions.

FallTech® SteelGrip® Horizontal Lifelines include:
- SteelGrip®® 60’ Cable HLL
- SteelGrip®® 60’ Cable Assembly

SteelGrip®® 60’ Cable HLL System kits include:
- Lifeline, tensioner, energy absorber and storage bag with carabiners and connecting rings.

SteelGrip®® 60’ Cable Assembly System kits include:
- Lifeline, tensioner, and storage bag with carabiners.

Systems also available with 24’ base clamps in 30’ to 100’ spans.

Complete Cable HLL Systems with 3/8” cable available in 30’, 60’, 80’ and 100’ lengths including two 6’ pass-through chokers for end-point anchorage plus our SteelGrip® line tension indicator.

Cable HLL assemblies for use with user-supplied anchorages feature our SteelGrip® line tension indicator and 3/8” cable; lengths longer than 60’ include 2 coil energy absorbers. Available in 10’ length increments from 30’ up to 330’; call for part #s and availability.

Complete SteelGrip®® 60’ Cable Assembly System kits include:
- Lifeline, tensioner, and storage bag with carabiners.

Systems also available with 24’ base clamps in 30’ to 100’ spans.

Complete Cable HLL Systems with I-beam Stanchions are offered with 3/8” cable in 30’, 60’, 80’ and 100’ lengths with adjustable base clamps to fit beam flanges from 4’ to 24’ wide. 30’ and 60’ systems include 1 coil energy absorber, 80’ and 100’ extended span systems include 2 coil energy absorbers and 3 stanchions and all include our SteelGrip® line tension indicator.

Complete SteelGrip®® 60’ Cable Assembly System kits include:
- Lifeline, tensioner, and storage bag with carabiners.

Multiple additional coil energy absorbers and installation hardware also available separately and in user-preferred combinations.

FallTech® Rooftop Horizontal Lifeline Kits include:
- SteelGrip®® 60’ Cable HLL
- SteelGrip®® 60’ Cable Assembly
- SteelGrip®® 60’ Cable HLL System kits include:
  - Lifeline, tensioner, energy absorber and storage bag with carabiners and connecting rings.

FallTech® SteelGrip® Horizontal Lifelines provide an adjustable length and portable anchorage solution for users working in the absence of proper anchorages along a horizontal surface. All SteelGrip® systems are designed for temporary use and are available with end-point anchorage options in various precut lengths for manageable on-site adjustment to match construction job site conditions.
SteelGrip® I-beam Stanchions deliver the flexibility to configure specific length systems by providing durable end-point and intermediate anchorage for temporary cable horizontal lifelines. Each stanchion features three modular components to securely adapt to your specific configurations as the jobsite changes, and for the ease of replacing and supplementing existing components. Post, base and clamp components are available separately and in combinations to fit I-beams from 4’ to 24’ wide and collectively provide simple installation and low cost of ownership.

**603018K SteelGrip® I-Beam Stanchion**

Each complete SteelGrip® Stanchion includes a 42’’ plated steel post and base plus one of three threaded clamp bar and wing nut combinations of 12’, 18’ and 24’ width capacity to fit various I-beam flanges.

- 03012K: Stanchion with 12’ clamp bar.
- 03018K: Stanchion with 18’ clamp bar.
- 03024K: Stanchion with 24’ clamp bar.

Universal base with clamp bar pairings plus threaded clamp bars with wing nuts are also offered separately for 12’, 18’ and 24’ I-beam flange widths to suit your specific system configurations.

**630018C Clamp Bar Set**

- 63012C: 12’ Stanchion clamp bar.
- 63018C: 18’ Stanchion clamp bar.
- 63024C: 24’ Stanchion clamp bar.

**630112CB Base and Clamp Set**

- 630112 CB: 12’ clamp bar with base.
- 630118CB: 18’ clamp bar with base.
- 630124CB: 24’ clamp bar with base.

In addition to clamp bars and base/clamp sets offered separately (shown above), individual replacement components are also available to supplement specific needs and to support your custom-build system configurations.

**630042P Stanchion Post**

**63003B I-Beam Base**

**630001T Pass-through Bracket**

**630002W Wing Nut**

The most effective method of proactively protecting workers from falls is to eliminate the fall hazard, and one of the most effective solutions for eliminating the hazard is with FallTech’s portable construction guardrail assembly. The dual-application guardrail assembly is adjustable for parapet wall and slab edge thicknesses from 6½” to 24½” and installs easily with common user-supplied 2 x 4 dimensional lumber. Each assembly features rail brackets for top and mid-rail guards and for toe-boards when used on slab edges. FallTech® temporary construction guardrails are highly portable and provide a cost-effective solution for common construction hazards like wall and floor openings, uncovered holes, roof and elevator openings and unprotected ramps and leading edges.

**6040422 Construction Guardrail Assembly**

For added versatility, we also offer the guardrail assembly components sold separately.

- **6402ADJ** Guardrail Clamp Base
- **6401422** 42’ Guardrail Post
- **6409PC** Post Adapter Sleeve

Guardrail assembly shown in parapet wall application.

Guardrail assembly shown in slab edge application.

**630012K Stanchion with 12’ clamp bar.**

**630018K Stanchion with 18’ clamp bar.**

**630024K Stanchion with 24’ clamp bar.**

For use with 7460A Parapet Anchor and 6401422 Post.
FallTech® for Tools™ are component products designed to help you hold on to your gear and prevent drop injuries to workers at lower levels. Utilized as a tool tethering system of compatible components, a typical assembly may contain a tool attachment, a tool tether and in some cases a tool anchor. FallTech for Tools™ provides multiple component options in each of these product groups so you can create tethering solutions to fit your tools and your work applications.

### Tool Attachments

D-ring attachments are designed for common hand tools without the means for connecting tethers directly and to create secure solutions for tools weighing up to 5 lbs.

<table>
<thead>
<tr>

  - Max Tool Wt: 5 lbs.

### Wrist Attachment Anchor

For interchangeable solutions commonly needed in close proximity work, our Wrist Attachment Anchor features a speed-clip receiver and a steel D-ring to provide multi-function adjustable attachment for speed-clips, carabiners and choke-on loops. Flexible neoprene and elastic with UniFit sizing for tools weighing up to 5 lbs.

- **5331A1**: Speed-clip and D-ring, UniFit, 1/pk
  - Max Tool Wt: 5 lbs.
- **5331A5**: Speed-clip and D-ring, UniFit, 5/pk
  - Max Tool Wt: 5 lbs.

### Speed-clip Tool Tethers

**Choke-on/Carabiner**

- **5029C**: Dual Steel Carabiners, 1/pk
  - Max Tool Wt: 15 lbs.
- **5031A**: Dual Aluminum Carabiners, 1/pk
  - Max Tool Wt: 15 lbs.

**Stretch-web Tool Tethers**

- **5029B**: Choke-on Loop, Basic Steel Carabiner 1/pk
  - Max Tool Wt: 5 lbs.
- **5029B10**: Choke-on Loop, Basic Steel Carabiner 10/pk
  - Max Tool Wt: 5 lbs.
- **5030A**: Choke-on Loop, Aluminum Carabiner 1/pk
  - Max Tool Wt: 15 lbs.
- **5030A10**: Choke-on Loop, Aluminum Carabiner 10/pk
  - Max Tool Wt: 15 lbs.

### Hard Hat Tethers

Specifically designed for securing hard hats, two user-preferred options are available to protect against the drop. Our stretch coil tether features a choke-on loop and snap-clip combination and the stretch web version includes an adjuster paired with a snap-buckle.

- **5329A5**: Stretch Coil 18" Cinch-loop/Snap-clip, 5/pk
  - Max Wt: 2 lbs.
- **5329A25**: Stretch Coil 18" Cinch-loop/Snap-clip, 25/pk
  - Max Wt: 2 lbs.
- **5330A5**: Stretch Web 25" Adjuster/Snap-buckle, 5/pk
  - Max Wt: 2 lbs.
  - Max Wt: 2 lbs.

### Tool Tethers

FallTech® Tool Tethers are the critical link for safely connecting users and their tools and are available in preferred configurations to suit most applications up to 15 lb. max. tool weight. All are constructed with woven elastic web and feature either choke-on loops paired with steel screwgate or aluminum twist-lock carabiner options or for added functionality, tethers are also available in dual-carabiner models.

- **5020B**: Choke-on Loop, Steel Carabiner 1/pk
  - Max Tool Wt: 15 lbs.
- **5020B10**: Choke-on Loop, Steel Carabiner 10/pk
  - Max Tool Wt: 15 lbs.
- **5030A**: Choke-on Loop, Aluminum Carabiner 1/pk
  - Max Tool Wt: 15 lbs.
- **5030A10**: Choke-on Loop, Aluminum Carabiner 10/pk
  - Max Tool Wt: 15 lbs.
- **5040C**: Dual Steel Carabiner, 1/pk
  - Max Tool Wt: 15 lbs.
- **5051A**: Dual Aluminum Carabiner, 1/pk
  - Max Tool Wt: 15 lbs.
FallTech’s Premium Roofer’s Kit is a complete Personal Fall Arrest System with value-added components not commonly included in similar solution kits. Among these are the harness with tongue buckle legs, the vertical lifeline with steel thimble and the rope adjuster grab featuring user trailing mobility.

Also available: 8595RA: with 18” Gear Bag
9103JK: 6’ choker substituted for hinged anchor

Complete Personal Fall Arrest Kit for roofing applications contains modestly priced components with economical functionality including mating buckle harness, construction-grade vertical lifeline and manually operated rope adjuster grab.

Also available: 8592A Economy Kit with 7444 single-use anchor

Whether working on sloped or flat roofs on residential or commercial structures, our prepacked roofers kits include everything needed in a Personal Fall Arrest System to keep users safe from common fall injuries and deliver solution options beyond mere compliance and economy.
MINI BUCKET AND GEAR BAG STORAGE // USER KITS

FallTech® User Kits provide you with user-based solutions by prepacking our most accepted harnesses and lanyards in convenient pairings to address the most common Fall Arrest needs. Kits include Contractor and FT Basic® harness options with single-leg Internal-series lanyards combined in a mini storage bucket or with a gear storage bag.

**9505Z** Mini Bucket User Kit
- **Tongue Buckle**

Convenient storage bucket contains 7016 single D-ring Contractor harness with Tongue Buckle legs and 8259 6' Internal Energy Absorbing lanyard.

**9500Z** Mini Bucket User Kit
- **Mating Buckle**

Convenient storage bucket contains 7015 single D-ring Contractor harness with Mating Buckle legs and 8259 6' Internal Energy Absorbing lanyard.

Also available: 9500Z with 7007 FT Basic® Harness

**9001HS** Gear Bag User Kit
- **Tongue Buckle**

Prepacked assembly features 7016 single D-ring Contractor harness with Tongue Buckle legs, 8259 6' Internal Energy Absorbing Lanyard and a gear storage bag.

Also available: 9000FW Kit with 8259 ViewPack® Lanyard

**9005PS** Gear Bag User Kit
- **Mating Buckle**

Prepacked kit features 7015 single D-ring Contractor harness with Mating Buckle legs, 8259 6' Internal Energy Absorbing Lanyard and a gear storage bag.

Also available: 9005PS Kit with 7007 FT Basic® Harness

---

**Fall Arrest Combinations // User Kits**

Build your preferred harness/lanyard combinations from our selection of detached components including up to five harness options and four lanyard configurations. Each lanyard features a choke-loop for Dorsal D-ring connection configured with either snap or rebar hooks for anchorage tie-off. Harness options include applications for Fall Arrest and Work Positioning with either mating buckle or tongue buckle legs. (Combination part numbers listed in table below)
