

The Universal Spill Station

Clean Up Spills Quickly & Safely

Reduce Slip & Fall Injuries

Floors are left clean, dry, and non slippery, faster than any other spill clean-up method. Avoid costly slip & fall claims.

Cut Labor Costs Up to 70%

The Universal Spill Station takes less time to use, is more economical than traditional methods.

There is no need to touch the spill, or remove debris including broken glass, making the Spill Station a safer, more sanitary method.

With no drying time, walkways are reopened in record time, minimizing your customers' inconvenience.

Safe to Use & Environmentally Friendly

XSORB is a recycled material from renewable resources. The production of XSORB does not harm the environment.

Meets and/or exceeds the requirements of the **FDA** and **USDA** for safe use around food. XSORB is non-toxic and environmentally safe. Meets EPA requirements, passing three tests determining that it **will not** leach absorbed liquids that may pose a threat to the environment. XSORB makes even hazardous liquids safe to dispose of.

Unlike clay products (kitty litter) XSORB is non-carcinogenic according to the IARC of the World Health Organization.

XSORB Universal is OMRI™ Listed (Organic Materials Review Institute) and Certified EcoLogo™, North America's largest, most respected environmental standard and certification mark.

Convenient and Easy to Use

The XSORB Universal Spill Station contains everything you need in one spot. The vinyl covered wire rack is wall-mountable and has fully illustrated instructions.
